CATALOG OF COPYRIGHT ENTRIES

Third Series

REMOVAL OF DEPOSITS FROM COPYRIGHT OFFICE

NOTICE is given to authors, copyright proprietors and other lawful claimants that they may claim and remove before January 1, 1954, any article of the following named classes of published works deposited for copyright between January 1, 1950, and January 1, 1951, not reserved or disposed of as provided by sections 213 and 214 of Title 17 of the United States Code and still remaining in the files of the Copyright Office at the time of the request for their removal. The classes of published works covered by this notice are:

Books and Pamphlets.

Contributions to periodicals.

Works of art; models or designs for works of art.

Reproductions of a work of art.

Drawings or plastic works of a scientific or technical character.

Photographs.

Prints and pictorial illustrations excluding prints or labels used for articles of merchandise.

Other published works and all unpublished works are excluded from this notice.

The request for the removal of any copyright deposit should be signed by the person entitled thereto or his duly authorized agent. Such request should identify the work by stating the title, author, copyright proprietor, registration number and year of deposit, and should be addressed to the Copyright Office, Library of Congress, Washington 25, D. C.

L. C. card, 6-35347

This number identifies the Library of Congress printed card for the complete series of the Catalog of Copyright Entries.

For sale by the Register of Copyrights, Library of Congress, Washington 25, D. C. Price for this part: \$0.50 per issue, \$1.00 per year.

PREFACE

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Each annual volume is subdivided to represent the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, together with a brief listing of the materials principally contained in each part, the symbols used to distinguish the materials, and the prices of semi-annual issues and of the annual subscription to the complete *Catalog*.

Each copyright registration listed in the *Catalog* is recorded in a main entry, which includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant, the copyright date, the copyright registration number, etc.). Cross-references, and, in some cases, indexes, are provided.

The name of the copyright claimant in each entry is that given in the application for registration. Available information in the records of the Copyright Office relating to subsequent changes of ownership can be obtained upon request and upon payment to the Register of Copyrights of the fee specified in the law for the conduct of a search of the records.

In the case of each registration listed, except for

renewals, the deposit of a copy (or copies) of the work has been made in accordance with the provisions contained in sections 12, 13, or 215 of Title 17 of the *United States Code*, or, in the case of published three-dimensional works of art, there has been compliance with section 202.8 (b) of the regulations of the Copyright Office, published in the Code of Federal Regulations, 1949 Edition, which provides for the deposit of identifying reproductions in lieu of the work itself. To distinguish foreign works, for which two copies have been deposited under section 215 of Title 17 of the *United States Code*, a zero immediately following the class symbol in the registration number has been used.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed for individual issues, as subscriptions for one or more parts or for the complete *Catalog*, and for periods of one or more years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the *Register of Copyrights*.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

		MU Unpublished motion pictures other than photoplays	

HOW TO USE THE CATALOG OF COPYRIGHT ENTRIES, PART 6

Maps and Atlases (Part 6) lists domestic and foreign maps, atlases, and other cartographic works registered in Class F and also similar works registered in other classes. The registrations in other classes are also listed in that part of the *Catalog* which covers the respective class. Part 6 includes in a separate section renewal registrations of works originally registered in Class F. Each registration is described in a main entry and cross-references are provided to facilitate the location of the main entries.

Part 6 consists of four sections: 1) an alphabetical list of main entries for works currently registered, arranged under the names appearing at the beginning of the entries (interfiled with the main entries are cross-reference entries beginning with other names for which a searcher might look; in each case, the cross-reference refers the searcher to the name under which the main entry can be found); 2) an index of areas and subjects, in which each registration is listed under a heading descriptive of the subject—geographical area or type, i. e., atlas, globe, etc.; 3) an alphabetical list of main entries for renewal registrations together with cross-references; and 4) a publishers' directory, which is an alphabetical list of the publishers of the works described in the first section, together with the latest address for each as given in the applications or the copies.

Each main entry is listed under the name of the person or corporate body principally responsible for the content of the work, otherwise known as the "authority." For currently registered works, cross-references are made for distinctive titles and for the names of claimants, editors, compilers, joint authors, draftsmen, and publishers; for renewal registrations cross-references are made for titles and for essential names given in the main entries. Cross-references are also made for variant forms of names.

The area headings used in the second section consist of the largest geographical or political units enclosed within the borders of the several maps.

When the borders of a map do not coincide in any way with a single geographical or political unit, the name of the most significant unit contained therein is used in the heading. When the map contains three or more States comprising part of one of the major geographical divisions of the United States, one of the following headings is used: Atlantic Seaboard; Gulf States; Middle States; Mountain States; New England States; North Central States, east; North Central States, west; Pacific States; South Atlantic States; South Central States, east; and South Central States, west. If the area shown on the map does not coincide with any of the foregoing 11 designations, one of the following subdivisions under "United States" is used: northern, northeastern, eastern, southeastern, southern, central, northwestern, western, or southwestern. Names of rivers, lakes, and other geographical features are used when necessary.

Each main entry for currently registered works includes, in addition to the name used as the heading, the following information descriptive of the work, if available and applicable:

- 1) Title.
- 2) Edition statement, together with information relating to previous publication.
- 3) Imprint, consisting of place of publication and name of publisher when these are given in the copy of the work.
- 4) Size, series, and scale (scale is given as a representative fraction, if it can be ascertained, and followed by the linear scale as it appears on the map), or, in the case of atlases and other books, pagination and illustration statement.
- 5) Descriptive notes.
- 6) Names of authors given in the application which do not appear elsewhere in the entry.
- 7) Name of the employer in the case of a work made for hire, if so named in the application, together with the names of the employees.

- 8) Information contained in the application which relates to the registration of an earlier version of the work.

When a sheet consists of two or more maps, all of which are included in the claim of copyright as given in the application, or when the title is selected from an outside cover and appears to include several specific map titles contained therein, the individual maps are listed in a note preceding the information relating to the claim of copyright. In all other cases in which there is indication, from facts known to the Copyright Office, that additional maps printed on the sheet are not included in a specific claim, the note appears in brackets following the information relating to the claim of copyright. The note includes the position of the additional maps in relation to the one for which the main entry is made—e. g., "On sheet with," "On verso." The note also contains the title of the additional map, or the number of maps if more than one, and, when accompanied by a separate copyright notice, a statement of the data contained in the notice. Inset maps, however, are noted only if they are included in the claim of copyright or if several appear on the verso, in which case they are included in the statement of the number of maps.

An asterisk preceding the title indicates that Library of Congress printed cards are available. Orders for or inquiries regarding these cards should be addressed to the Card Division of the Library of Congress, Washington 25, D. C.

Information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes the following:

- 1) A brief statement of the new matter on

which copyright is claimed when this information is given in the application.

- 2) Name of the claimant.
3) Date of publication as given in the application.
4) Registration number.

An explanatory note is added to a main entry whenever it is necessary to indicate a variation in information which relates to the publication date or the name of the claimant as given in the application and the copy of the work.

For renewal registrations, the main entry includes, in addition to the heading, the following information descriptive of the work:

- 1) Title, including the area.
2) Edition and other descriptive data, if given in the application.

Information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes:

- 1) A brief statement of the new matter on which the original copyright was claimed if available in the renewal application or the records of the Copyright Office.
2) Date of original copyright.
3) Original registration number.
4) Renewal registration number.
5) Date of receipt of the renewal application.
6) Name of the renewal claimant, followed by an abbreviation in parentheses representing the claimant's statement of the basis of his renewal claim—e. g., John Doe (NK) indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.

ABBREVIATIONS AND SYMBOLS

The following list includes abbreviations and symbols used in this catalog with specific copyright or bibliographic meanings. Definitions are not given for abbreviations in common use.

(A)	—author	col.	—colored
a.k.a.	—also known as	comp.	—compiler
©	—copyright symbol	d.b.a.	—doing business as
c (followed by date)	—the year of publication as given in the copyright notice	(E)	—executor(s) of the author
(C)	—child or children of the deceased author	ed.	—edited by, editor, edition
ca.	—circa	fold.	—folded
cm.	—centimeter, centimeters	(NK)	—next of kin of the author who is not living, there being no will
		p.	—page, pages

(PCB)	—proprietor of a work copyrighted by a corporate body otherwise than as assignee or licensee of the author	(PWH)	—proprietor of copyright in a work made for hire
(PCW)	—proprietor of the composite work	rev.	—revised, revised by, revision
(PPW)	—proprietor of the posthumous work	t.a.	—trading as
pseud.	—pseudonym	tr.	—translator
pub.	—published, publishing	v., vol.	—volume, volumes
		(W)	—widow of the author
		(Wr)	—widower of the author

COPYRIGHT REGISTRATIONS FOR MAPS

January–June 1953

Class F—Maps published in the United States	1,104
Maps published outside the United States	2
Total ..	1,106
Renewals	302

The above figures represent the number of registrations for maps for January–June 1953, but do not necessarily represent the exact number of entries in this issue of the *Catalog of Copyright Entries*. Registration figures for other classes of material may be found in the respective parts.

MAPS AND ATLASES

An alphabetical list of all maps, atlases, and other cartographic works registered during the period covered by this catalog. Each work is entered under authority (that is, the name of the person, firm, institution, or other agency primarily responsible for the content of the work). Included in the list are cross-references from distinctive titles, copyright claimants, editors, compilers, joint authors, draftsmen, and publishers.

INDEX OF AREAS AND SUBJECTS

An index in which each work included in the first section in this catalog is entered under headings descriptive of its subject, geographical area, or type (e.g., atlas, globe, etc.). The name under which each entry will be found follows that of the geographical area represented in the work. The title of the work follows the name.

PREFATORY NOTE

This index is designed to meet the needs of those who are searching for a map of a specific area or one pertaining to a special subject. Specific headings have been used insofar as possible. Where it is found necessary to combine closely related headings, cross-references are made from one heading to the other, e.g., Outline Maps. SEE Base and Outline Maps.

The index consists of brief references to the main entries in the first section. The entries

give the subject, including area or type of the work, the name of the authority, and the title of the work.

The area headings consist of the largest geographical or political units enclosed within the borders of the several maps. When the borders of a map do not coincide in any way with a single geographical or political unit, the name of the most significant unit contained therein is used in the heading. When a map contains three or more States comprising part of one

of the geographical divisions of the United States, one of the headings which is given in the "List of Geographical Headings" is used. If the area shown on the map does not coincide with any of the geographical designations, one of the following subdivisions under "United States" is used: northern, northeastern, eastern, southern, southeastern, central, northwestern, western, or southwestern. Names of rivers, lakes, and other geographical features are used when necessary.

COPYRIGHT OFFICE
THE LIBRARY OF CONGRESS
WASHINGTON: 1954

REMOVAL OF DEPOSITS FROM
COPYRIGHT OFFICE

NOTICE is given to authors, copyright proprietors and other lawful claimants that they may claim and remove before January 1, 1955, any article of the following named classes of published works deposited for copyright between January 1, 1951, and January 1, 1952, not reserved or disposed of as provided by sections 213 and 214 of Title 17 of the United States Code and still remaining in the files of the Copyright Office at the time of the request for their removal. The classes of published works covered by this notice are:

Books and Pamphlets.

Contributions to periodicals.

Works of art; models or designs for works of art.

Reproductions of a work of art.

Drawings or plastic works of a scientific or technical character.

Photographs.

Prints and pictorial illustrations excluding prints or labels used for articles of merchandise.

Other published works and all unpublished works are excluded from this notice.

The request for the removal of any copyright deposit should be signed by the person entitled thereto or his duly authorized agent. Such request should identify the work by stating the title, author, copyright proprietor, registration number and year of deposit, and should be addressed to the Copyright Office, Library of Congress, Washington 25, D. C.

L. C. card, 6-35347

This number identifies the Library of Congress printed card for the complete series of the Catalog of Copyright Entries.

For sale by the Register of Copyrights, Library of Congress, Washington 25, D. C. Price for this part: \$0.50 per issue, \$1.00 per year.

PREFACE

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Each annual volume is subdivided to represent the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used in the registration numbers to distinguish the classes, and the prices of the semi-annual issues. The annual subscription for each part is twice the price of a single issue and the complete catalog, including all parts, may be secured on a subscription basis for \$20 a year.

Each copyright registration listed in the *Catalog* is recorded in a main entry, which includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant, the copyright date, the copyright registration number, etc.). Cross-references, and, in some cases, indexes, are provided.

The name of the copyright claimant in each entry is that given in the application for registration. Available information in the records of the Copyright Office relating to subsequent changes of ownership can be obtained upon request and upon payment to the Register of Copyrights of the fee

specified in the law for the conduct of a search of the records.

In the case of each registration listed, except for renewals, the deposit of a copy (or copies) of the work has been made in accordance with the provisions contained in sections 12, 13, or 215 of Title 17 of the *United States Code*, or, in the case of published three-dimensional works of art, there has been compliance with section 202.8 (b) of the regulations of the Copyright Office, published in the Code of Federal Regulations, 1949 Edition, which provides for the deposit of identifying reproductions in lieu of the work itself. To distinguish foreign works, for which two copies have been deposited under section 215 of Title 17 of the *United States Code*, a zero immediately following the class symbol in the registration number has been used.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed for individual issues, as subscriptions for one or more parts or for the complete *Catalog*, and for periods of one or more years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the *Register of Copyrights*.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should

be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

In the following table, the symbols listed represent the materials principally contained in each part; for other materials, including renewals (always designated by the symbol R), which may be included in a particular part and for a more complete statement of contents, the respective "How-to-Use" section should be consulted. In a registration number a zero immediately following the symbol, i. e., AF0, EF0, indicates that two copies of a foreign publication have been deposited with a catalog card and application for registration, under the provisions of section 215 of Title 17 of the *United States Code*.

HOW TO USE THE CATALOG OF COPYRIGHT ENTRIES, PART 6

Maps and Atlases (Part 6) lists domestic and foreign maps, atlases, and other cartographic works registered in Class F and also similar works registered in other classes. The registrations in other classes are also listed in that part of the *Catalog* which covers the respective class. Part 6 includes in a separate section renewal registrations of works originally registered in Class F. Each registration is described in a main entry and cross-references are provided to facilitate the location of the main entries.

Part 6 consists of four sections: 1) an alphabetical list of main entries for works currently registered, arranged under the names appearing at the beginning of the entries (interfiled with the main entries are cross-reference entries beginning with other names for which a searcher might look; in each case, the cross-reference refers the searcher to the name under which the main entry can be found); 2) an index of areas and subjects, in which each registration is listed under a heading descriptive of the subject—geographical area or type, i.e., atlas, globe, etc.; 3) an alphabetical list of main entries for renewal registrations together with cross-references; and 4) a publishers' directory, which is an alphabetical list of the publishers of the works described in the first section, together with the latest address for each as given in the applications or the copies.

Each main entry is listed under the name of the person or corporate body principally responsible for the content of the work, otherwise known as the "authority." For currently registered works, cross-references are made for distinctive titles and for the names of claimants and publishers. References are also made for other names indicated in the body of the main entries except as follows: names identified as those of employees for hire; names of authors given only in the application; names of illustrators, draftsmen, compilers, editors, etc., unless given in the application. When more than two authors are named in the entry, a reference for the first named is as a rule the only one given. For

renewal registrations, cross-references are made for titles and for essential names given in the main entries. Cross-references are also made for variant forms of names.

The area headings used in the second section consist of the largest geographical or political units enclosed within the borders of the several maps. When the borders of a map do not coincide in any way with a single geographical or political unit, the name of the most significant unit contained therein is used in the heading. When the map contains three or more states comprising part of one of the major geographical divisions of the United States, one of the following headings is used: Atlantic Seaboard; Gulf States; Middle States; Mountain States; New England States; North Central States, east; North Central States, west; Pacific States; South Atlantic States; South Central States, east; and South Central States, west. If the area shown on the map does not coincide with any of the foregoing eleven designations, one of the following subdivisions under "United States" is used: northern, northeastern, eastern, southeastern, southern, central, northwestern, western, or southwestern. Names of rivers, lakes, and other geographical features are used when necessary.

Each main entry for currently registered works includes, in addition to the name used as the heading, the following information descriptive of the work, if available and applicable:

- 1) Title.
- 2) Series title if it appears on the application preceding the title of the work.
- 3) Names of other persons associated with the creation of the work.
- 4) Edition statement, for all editions subsequent to the first together with information relating to previous publication, revision and the like.
- 5) The name of the publisher, if this is different from the name in the heading and from the copyright claimant.

- 6) Physical description, limited to terms descriptive of globes and relief models. For atlases and other book material in one volume the last number of the principal group of pages is given; for works in more than one volume which are included in a single registration, the number of volumes is given.
- 7) Scale (given as a representative fraction if it is stated in the map, or if it can be ascertained from a graphic scale or from other sources on the work). If the work contains a statement of linear equivalence, such a statement is given in the form shown on the work.
- 8) Descriptive notes.
- 9) Names of authors given in the application which do not appear elsewhere in the entry.
- 10) Name of the employer in the case of a work made for hire, if so named in the application, together with the names of the employees.
- 11) Information contained in the application which relates to the registration of an earlier version of the work

An asterisk preceding the title indicates that Library of Congress printed cards are available. Orders for or inquiries regarding these cards should be addressed to the Card Division of the Library of Congress, Washington 25, D. C.

Information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes the following:

- 1) A brief statement of the new matter on which copyright is claimed when this information is given in the application.

- 2) Name of the claimant.
- 3) Date of publication as given in the application.
- 4) Registration number.

An explanatory note is added to a main entry whenever it is necessary to indicate a variation in information which relates to the publication date or the name of the claimant as given in the application and the copy of the work.

For renewal registrations, the main entry includes, in addition to the heading, the following information descriptive of the work:

- 1) Title, including the area.
- 2) Edition and other descriptive data, if given in the application.

Information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes:

- 1) A brief statement of the new matter on which the original copyright was claimed if available in the renewal application or the records of the Copyright Office.
- 2) Date of original copyright.
- 3) Original registration number.
- 4) Renewal registration number.
- 5) Date of receipt of the renewal application.
- 6) Name of the renewal claimant, followed by an abbreviation in parentheses representing the claimant's statement of the basis of his renewal claim—e.g., John Doe (NK) indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.

ABBREVIATIONS AND SYMBOLS

The following list includes abbreviations and symbols used in this catalog with specific copyright or bibliographic meanings. Definitions are not given for abbreviations in common use.

(A)	—author	p.	—page, pages
a.k.a.	—also known as	(PCB)	—proprietor of a work copyrighted by a corporate body otherwise than as assignee or licensee of the author
©	—copyright symbol	(PCW)	—proprietor of the composite work
c (followed by date)	—the year of publication as given in the copyright notice	(PPW)	—proprietor of the posthumous work
(C)	—child or children of the deceased author	pseud.	—pseudonym
ca.	—circa	pub.	—published, publishing
cm.	—centimeter, centimeters	(PWH)	—proprietor of copyright in a work made for hire
col.	—colored	rev.	—revised, revised by, revision
comp.	—compiler	t.a.	—trading as
d.b.a.	—doing business as	tr.	—translator
(E)	—executor(s) of the author	v., vol.	—volume, volumes
ed.	—edited by, editor, edition	(W)	—widow of the author
fold.	—folded	(Wr)	—widower of the author
(NK)	—next of kin of the author who is not living, there being no will		

COPYRIGHT REGISTRATIONS FOR MAPS

July–December 1953

Class F—Maps published in the United States	1351
Maps published outside the United States	3
Total	1354
Renewals	441

The above figures represent the number of registrations for maps for July–December 1953, but do not necessarily represent the exact number of entries in this issue of the *Catalog of Copyright Entries*. Registration figures for other classes of material may be found in the respective parts.

MAPS AND ATLASES

An alphabetical list of all maps, atlases, and other cartographic works registered during the period covered by this catalog. Each work is entered under authority (that is, the name of the person, firm, institution, or other agency primarily responsible for the content of the work). Included in the list are cross-references from distinctive titles, copyright claimants, joint authors, and publishers.

INDEX OF AREAS AND SUBJECTS

An index in which each work included in the first section in this catalog is entered under headings descriptive of its subject, geographical area, or type (e.g., atlas, globe, etc.). The name under which each entry will be found follows that of the geographical area represented in the work. The title of the work follows the name.

PREFATORY NOTE

This index is designed to meet the needs of those who are searching for a map of a specific area or one pertaining to a special subject. Specific headings have been used insofar as possible. Where it is found necessary to combine closely related headings, cross-references are made from one heading to the other, e.g., Outline Maps. SEE Base and Outline Maps.

The index consists of brief references to the main entries in the first section. The entries

give the subject, including area or type of the work, the name of the authority, and the title of the work.

The area headings consist of the largest geographical or political units enclosed within the borders of the several maps. When the borders of a map do not coincide in any way with a single geographical or political unit, the name of the most significant unit contained therein is used in the heading. When a map contains three or more States comprising part of one

of the geographical divisions of the United States, one of the headings which is given in the "List of Geographical Headings" is used. If the area shown on the map does not coincide with any of the geographical designations, one of the following subdivisions under "United States" is used: northern, northeastern, eastern, southern, southeastern, central, northwestern, western, or southwestern. Names of rivers, lakes, and other geographical features are used when necessary.
